

Good for Your Employer.
Good for the Industry.
Better for You!

Northeast Ohio Chapter ISCEBS Effective Global Benefits Management: "Thinking Globally - Acting Locally" January 25, 2018

The January 2018 joint WEB/ISCEBS program will examine how employers are effectively managing their global benefits challenges. The program will consist of a panel of employers that will share their practical experiences with getting transparency and leveraging resources to achieve efficiencies within their global footprint.

The program will examine recent trends in the global benefits space where effective strategies around plan design & administration; governance & compliance; financial management and participant advocacy have yielded positive outcomes. The panel will discuss ways in which they are creating a competitive benefits landscape around the world while seizing upon opportunities to streamline programs and contain costs.

We will also hear about how the employers on the panel address common global benefits themes such as health care costs; retirement readiness; financial wellness and well-being. We will learn how they are able to maintain the balancing act of thinking globally while acting locally.

Topics of discussion may include, but will not be limited to:

- What are the current trends in global benefits management?
- How are employers meeting governance and compliance challenges?
- How can employers leverage plan design and administration globally?
- How do you implement a global benefits platform while maintaining local identity?
- How has global benefits changed in recent years to allow for savings opportunities?
