Work from home is the “new normal” during COVID-19 and beyond. However, according to a recent survey conducted by Hinge Health, makeshift home offices and remote work are having an adverse effect on back and joint pain and related mental health issues. Learn more about increasing health risks in the remote workplace and innovative benefit strategies you can adopt to address them.

Top Take Aways

- The latest survey results conducted by Hinge Health reveal back & joint pain and related mental health issues are on the rise during remote work due to COVID-19
- The current challenges with MSK care
- Innovative new healthcare benefits like a one-stop shop digital MSK clinic to help address these challenges

Speaker: Jeff Krauss, MD, Chief Medical Officer, Hinge Health

Dr. Krauss graduated from Harvard College, earned his Medical degree from UC San Francisco School of Medicine, and completed his residency in Physical Medicine & Rehabilitation at Stanford University. He is a Clinical Assistant Professor at Stanford University in the Department of Orthopedics, and he continues to practice as a part-time Staff Physician at the VA Palo Alto Health Care System.
